

What Campaign Will You Be Supporting?

The OVAL Smart Sensor System BY CLAUDIA PAREDES

Making your house a smart home was never easier. As a homeowner I want to make sure I have an eye on everything in my house—from the basement to the upstairs bedroom. But until the OVAL arrived, there was no easy way to do it.

This tiny device, about the size of a quarter, attaches itself to anything and will let you know when it senses activity. It will notify you via the app immediately if there have been any changes. You can also use a web browser on a laptop to adjust the settings and get updates. The OVAL won't solve all your problems at home, it won't open windows and close doors, it won't dim light bulbs—this device is used to inform you, and hopefully prevent a disaster.

It will notify you via text, email, and it will even give you a call if it detects any changes. You can add more than one number to the notifications list. So that way, more than one person can get notified in case of an emergency. The sensor is extremely sensitive so you want to make sure to set parameters that won't have your phone buzzing all day long.

It detects motion. You might think why would I need to know this? Security is one of the most important things to any homeowner. You can place OVAL on the door, or a window

when you go on vacation and you will be alerted when this one is tampered with. Another place where you can put the OVAL is a private cabinet. The sensor will notify you if it has been opened. Using the application, you can customize how sensitive you want it to be. I tried it at very high sensitivity and the slight touch of the OVAL sent a notification to my phone.

It also detects light. This option is also customizable. You can place the OVAL on a lamp, and using the application you can pick the acceptable level of light of the specific place the sensor is at. If you have kids staying up late, you will know right away.

One of my favorite features is its ability to detect moisture. In a similar way how the user can customize the acceptable light, the user can also customize the acceptable levels of moisture in a specific space. For example, put the OVAL in your basement and as soon as it detects high levels of humidity it will send you an alert. If it's consistently humid, maybe it's time for a dehumidifier. It also detects floods. So if it rains hard, or a pipe bursts in your basement while you are away, you will know right away and get to the problem sooner.

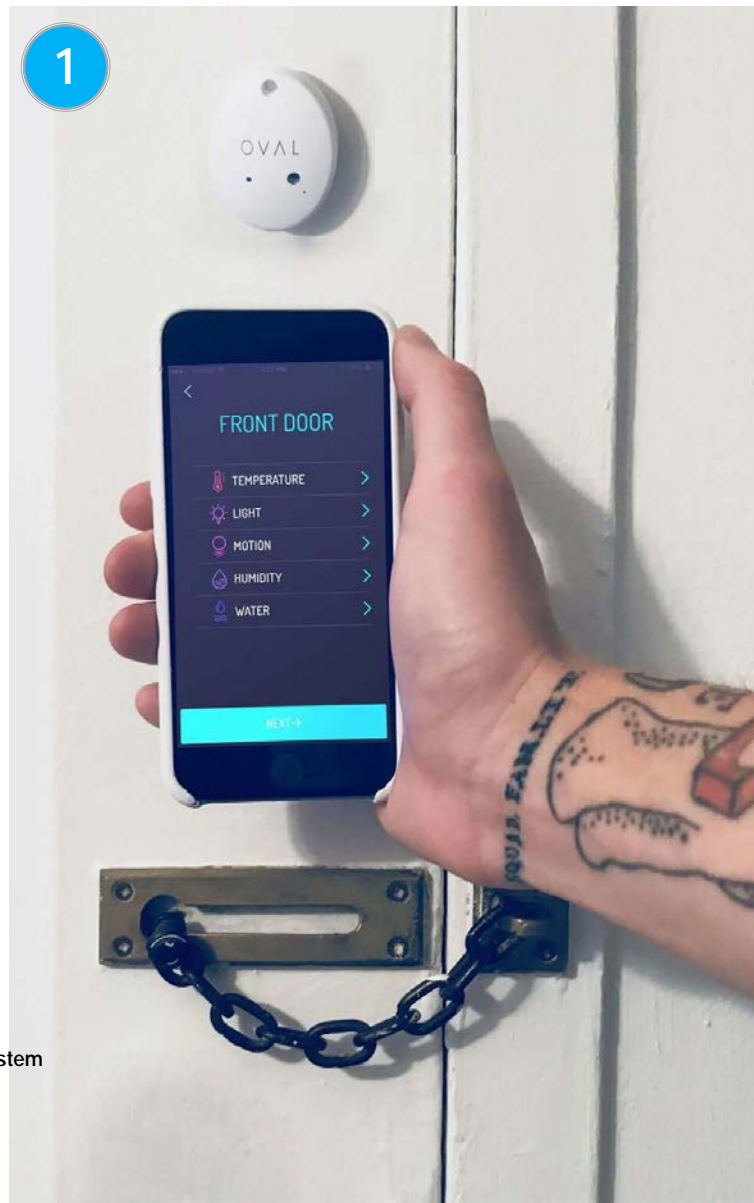

You might already have a Nest at home, but for those without it, OVAL provides a simple

solution to prevent your home from getting too hot or too cold. The temperature monitor allows you to select actual and target temperatures, and select at what temperature range at the OVAL will send you a notification.

Finally, make sure all your precious belongings stay close to you. The proximity monitor will notify you if the sensor is out of range and too far from the gateway. Like I said

before, this is an informative tool—it won't tell you where this belonging went.

The OVAL sensor works together with a gateway which connects to the router or modem—it needs the power of the internet to work. Make sure you place each sensor within 150ft of the gateway, otherwise it won't work. Finally, you can use up to 15 sensors with one gateway—wouldn't that be fun!

Bandito: A Mosquito Blocker You Wear On Your Wrist

Finally, a new way to protect yourself from mosquitoes! The Bandito wristband utilizes non-toxic scent in combination with powerful sonic sound to create the ultimate portable shield against mosquitoes. Put it on in the morning and you're set all day! It's time to take back the outdoors from annoying mosquitoes.

NON-TOXIC SCENT STRIPS

It smells great to you but not to them. Here are the main ingredients used:

- Citronella - Hands down the most effective natural alternative to DEET
- Peppermint - Refreshing to us, revolting to mosquitoes
- Lemongrass - Nothing repels a mosquito better than this

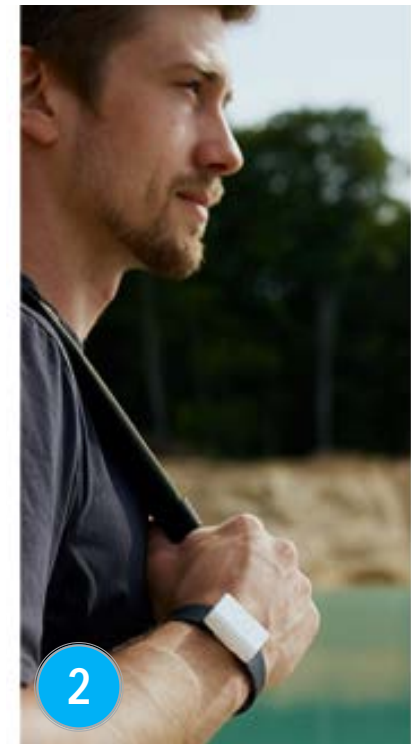

lemon-citrus scent

SONIC SOUND

Have you every heard a sound that makes you cringe? The Bandito emits a sound that makes mosquitoes cringe. This sound is so irritating to mosquitoes that they'll fly away before bothering you.

Hear it for yourself! Place it close to your ear and you'll notice a faint buzzing. It's nearly impossible for humans to hear otherwise. Mosquitoes, on the other hand, will be hearing it for sure!

Still curious? Check out the video below to get a better idea of how loud the Bandito is outside.

Epic Event: The Most Powerful Pocket Projector

Epic Event is equipped with easy-to-use sharing features, such as Wi-Fi and HDMI connectivity with screen mirroring, to switch between friends or coworkers easily.

It's even compatible with both iOS and Android devices to seamlessly stream your favorite entertainment from any device. Did we mention it can connect flawlessly to your Xbox or PS3/PS4 system for the ultimate gaming experience?

No more moments of, Awh man, I only had five minutes left of that movie! and more moments of Awesome, I have time to watch the sequel!

Epic Event packs a powerful 3-hour battery life, unlike other projectors that come in at a measly 1-2 hours before you have to reach for the charging cable.

Make watching your favorite entertainment or presenting in the office less of a hassle with Epic Event's easy setup—just position, point, and play! You can't get simpler than that.

Epic Event's built-in speaker further immerses you into an enhanced viewing experience unlike anything, or any projector, before. Want to listen to music? Have it double as a portable speaker with included

Wi-Fi connectivity right from any device.

The Epic Event pico projector, with an incredible 150-inch HD picture, allows you to share media in real life with your friends and family anywhere you go. Its lightweight design and compact size

(approximately the size of two decks of cards!) make Epic Event the perfect travel companion for business trips and vacations. Easy setup and screen mirroring allow you to enjoy an enhanced visual experience conveniently and, most importantly, personally.

MTGS1000D-1A

MT-G METAL TWISTED G-SHOCK

Forged parts

The bezel and case back are both cast from metal pellets. These pellets are repeatedly subjected to a pressure-molding process to produce robust, highly elaborated metal parts that exude high quality.

Layered composite band

The band structure features pure stainless-steel parts combined with lightweight, high-durability fine resin parts. The result is a lighter band that achieves comfortable wearability while maintaining the solid feel of metal.

Sallaz polishing

Sallaz mirror polishing, the most sophisticated of polishing techniques, is applied to beveled surfaces of the case, the bezel and selected band pieces to create beautiful mirror surfaces. The process brings out the beauty of the metal to the maximum.

HyperDrive 7.5W Qi Wireless Charger & USB-C Hub

New HyperDrive USB-C Hub with integrated retractable cable turns a single USB-C port into 8 ports (4K HDMI, Gigabit Ethernet, microSD, SD, 3 x USB 3.1 and USB-C Power Delivery). Update: Cable will be detachable so you can use a longer cable if you wish.

Using the latest Qi wireless

charging standard that supports 7.5W high speed iPhone 8/X wireless charging. Also supports 5/10/15W high speed Android wireless charging.

Wirelessly charge your iPhone flat or while standing up, in landscape or portrait mode with a convertible iPhone

stand that does not interfere with your swipe gestures. HyperDrive has not 1 but 3 wireless charging coils to ensure that there are no wireless charging blind spots.

High quality hinges (used in laptops) allow for unlimited adjustable viewing angles.

Use the built-in retractable USB-C cable to connect HyperDrive Hub + Wireless Charger to the computer. Connect separate USB-C power to HyperDrive to provide power delivery to the computer or to operate HyperDrive as a standalone wireless charger (e.g. nightstand).

Pandere: Cute, Expandable Shoes for Unique Feet

Shoe shopping is supposed to be a fun activity for women to do together, however some women who experience edema as a symptom of other conditions (such as diabetes, arthritis, treatment of cancer or circulatory and vascular conditions) can find it to be a discouraging and strenuous journey.

Everyone deserves to have shoes that fit, and Pandere™ makes sure that every woman feels confident and comfortable in their shoes. Pandere™ shoes encompass comfort, style,

and expandability all in a pair of shoes that fit to YOU!

Typical expandable footwear allows for wiggle room in only one to two areas of the shoe, whereas Pandere's patented shoes offer expandability in three areas of the shoe. Customize your shoes in the toebox, midfoot, and even the ankle and heel to reach ultimate levels of comfort. These shoes expand up to 1.5 shoe sizes in width and volume!

Some days our feet just aren't the same size, and now you

have the ability to expand each shoe to fit each unique foot.

Most expandable and comfortable shoes are unattractive and resemble something that we might find in our grandma's closet. Pandere shoes come in a variety of colors and designs to fit different styles, personalities and occasions.

Pandere's patented shoes are made with incredibly supportive and comfortable neoprene—it's even strategically located in all the

right places to accommodate feet of all shapes and sizes. They adjust to your feet instead of your feet adjusting to them. Our insoles are even constructed with orthotic support.

Found your perfect "sole-mates" already? Pandere's footwear allows you to remove and replace the soles with your own customized orthotics to give you the maximum comfort possible. Pandere footwear doesn't constrict your feet or your individual style.

Hiuni: A smart, connected GoTo Telescope

Hiuni's interactive iOS and Android apps engage both kids and adults with STEM principles and subjects like science and astronomy, igniting curiosity through discovery and exploration. Hiuni has reimagined the telescope by replacing the traditional eyepieces with double image sensors, providing in-app enhanced live views that allows observation with family and friends at the same time. More than just a live view, our tablet app provides additional educational content (video, images, audio), interactivity

(discovery, story modes, tours), challenges (badges, mini-games, unlockable content) and more to expand the stargazing experience.

Under the hood, the Hiuni Smart Telescope features an exceptionally sleek Cassegrain design with precision optics, dual-motor GoTo auto-aligning control and, two night-sky optimized images sensors. Specs include:

- Computerized Telescope: Interactive App Controlled, Go-To functionality, Celestial Vision Alignment (Platesolving

and tracking), Hiuni's Sky Map Database.

- Telescope Hardware: Motorized Alt-Az Mount, Dual Aptina MT9M001 Sensors (Space View in Color and Sky View in B&W), 1,280 x 1,024 Resolution, GPS, Accelerometer, Magnetometer.

- Main Barrel Optics: Cassegrain Design, 152.4mm Aperture, 280mm Barrel, .27° View Angle, 1,524mm Focal Length, 10 Ratio, 12.8 Stellar Magnitude.

- Motorized Telescope: Use

its computerized, GoTo auto-aligning feature or control with in-app virtual joystick in the live Sky View.

- Smart Features: Plate-solving, Good to See Guide, Image Stacking (Deep Light Imaging), Dual Live View, Share View, Auto Electronic Focuser, One Touch Live View.

- Hiuni Interactive Telescope App: Educational content, Interactivity Tours, Challenges, image capture, photo library, events calendar, bookmarking and more.
